P R E S E N T E S

Next we request and express the intention of being considered in the 100 x 100 Project.

1) 1) APPLICANT INFORMATION.

Rotary Club __Morelia Campestre #21280

Club Rotaract _____ (Club Padrino _____)

Club Interact _____ (Club Padrino _____)

2) Name: _LAE Armando Dueñas Díaz

Address: Antonio Plaza 773, Col. Lomas de Santa María, Morelia, Michoacán

District and Club Number: __4140 # 21280_____

NAME OF THE PROJECT

CLINIC OF MAXILAR ORTHOPEDICS AND INTERCEPTIVE ORTHODONTICS PHASE 2

3) OBJECTIVE OF THE PROJECT

Decrease the rate of dental malocclusions in a pediatric population from 4 to 11 years of age, with some maxillofacial deformity that allows a favorable modification of growth and development, standardizing a guide of clinical procedures that facilitates the planning of orthopedic-orthodontic treatment of patients who go to the clinic.

4) DESCRIPTION OF THE PROJECT, SHORT AND LONG TERM DETAILED

In the short term, intercepting malocclusions at an early age that allow redirecting craniofacial growth of different anomalies of the craniofacial complex, with the purpose of reducing the treatment time for a second phase with fixed appliances, avoiding it or accelerating the treatment time, also slowing down the deleterious defect of its maxillofacial development, added to an unharmonic growth, improving the breathing and quality of life of our patients, eliminating nasal or oronasal breathing. As well as eliminating harmful habits (eg, atypical swallowing or neuromuscular problems that affect growth), developing good maxillomandibular growth.

In the long term it will be the improvement in the maxillofacial development of our patients, as well as an occlusal and neuromuscular rehabilitation, which translates into the stability of the treatment, as well as a neuromuscular pacification and improvement in the quality of life and breathing of our patients, changing the posture that could be transformed into patients with

cervicocephalus in the future, as well as musculoskeletal problems, affecting the posture and rotating the position of the spine also altering it and affecting the growth and development of the individual, decreasing the patient's self-esteem and performance in the different social spheres of his daily life.

5) EXPLANATION OF THE SUSTAINABILITY OF THE PROJECT IF YOU HAVE IT

Within the Ministry of Health and in a more specific way of the Children's Hospital of Morelia, there are Specialist Professionals in Orthodontics and Maxillary Orthopedics, who would provide care to patients who come in the hours that would be offered: morning and evening care. Also having recovery costs in these treatments, where it would be raising funds to continue having new instruments and consumables as wide as possible.

This Project could be financed financially as follows:

The patient who comes to the office for the first or subsequent time (each month) paying the amount of \$ 200.00 (two hundred pesos 00/100 M.N.). If both parties agree to start the treatment, they will pay an average of \$ 1,500.00 (one thousand five hundred pesos 00/100 MN) as a single payment for "start of treatment and diagnosis" and \$ 500.00 up to one thousand pesos more (five hundred to one thousand pesos 00/100 MN) for each brace used throughout the treatment.

With the above, not only would maintenance be provided to the equipment that required it, but also the acquisition of new material, instruments or equipment that would be necessary for the clinic to function optimally, according to the needs of the service would be achieved. .

6) DIRECT AND INDIRECT BENEFICIARIES BREAKDOWN YOUR VULNERABLE SITUATION ATTACHING IMAGES.

In the state of Michoacán, there are no public hospitals that offer the Maxillary Orthopedic and Interceptive Orthodontics Services that allow to provide care to the population that requires it, thus being a specialized attention privately, where sometimes the patient due to lack of resources economic or due to the high costs that prevents them from undergoing timely treatment, thus existing the need to provide assistance to the Moreliana population and surrounding municipalities.

The direct beneficiaries would be our own patients, who, if treated early, would have many improvements not only in the stomatognathic system (mouth), but also in the social field, creating a more self-assured child without any complexity in the social field with a good maxillomandibular growth, and occlusal stability, translating into a harmonious development of the individual, likewise a child more confident and happy in his growth and development for life.

9) PROJECT BUDGET

The project budget is \$ 142,092.00, broken down as follows:

INPUT	QUANTITY
From the requesting club	\$ 20,000.00
Resources from other sources in Mexico: FURMEX or others	\$
Support proposed by H2H	\$ 122,092.00
SUMA	\$
TOTAL	\$ 142,092.00 PESOS

NOTE: The minimum commitments for requesting clubs are as follows:

Project Size (Pesos) Minimum commitment of the applicant (Pesos)

C Rotary 10,000 - 100,000 20% of the total project budget

C Rotary 100,000 - 200,000 20,000

C Rotaract or Interact 10,000 - 200,000 10% of the total project budget
