

Rotary International (RI) Direct Member Compare

This feature allows for comparison of member data between RI and DACdb on one easy screen such as the example shown below.

Warrenton Member Compare

The member information is summarized below. Click on the Compare link to review the member detail. Click on "**Get MemberID**" link to retrieve the member's MemberID from RI. [Edit Club](#)

!= means the fields shown do not match. Check the Modified Date, MemberID, and/or spelling of the member's name. These are the most logical reasons the compare at this level failed. Members listed at the top in DACdb's listing were not found in RI *OR* the MemberID is incorrect. Check before sending RI another ADD!

Note: Color coding has been removed because it is possible to update DACdb member fields that do not get sent to RI. The updated modified date was used to trigger the color coding. The != symbol below is more than likely due to the difference in the Modified Date. Use the compare to see the detailed comparison.

3. The member's data from both the RI database and DACdb will be shown side by side to facilitate comparison. For each field that is in conflict, an arrow (or set of arrows) will be displayed between the fields. Two arrows (facing opposite directions, as indicated by #1 below) will appear when data exists in both databases, allowing the user which data to copy to the other. One arrow (as indicated by #2 below) will appear when data exists in only one database (and this field is blank in the other database), providing an option to populate the data into the other database.
