

## New User Interface (UI) - Icon Pages

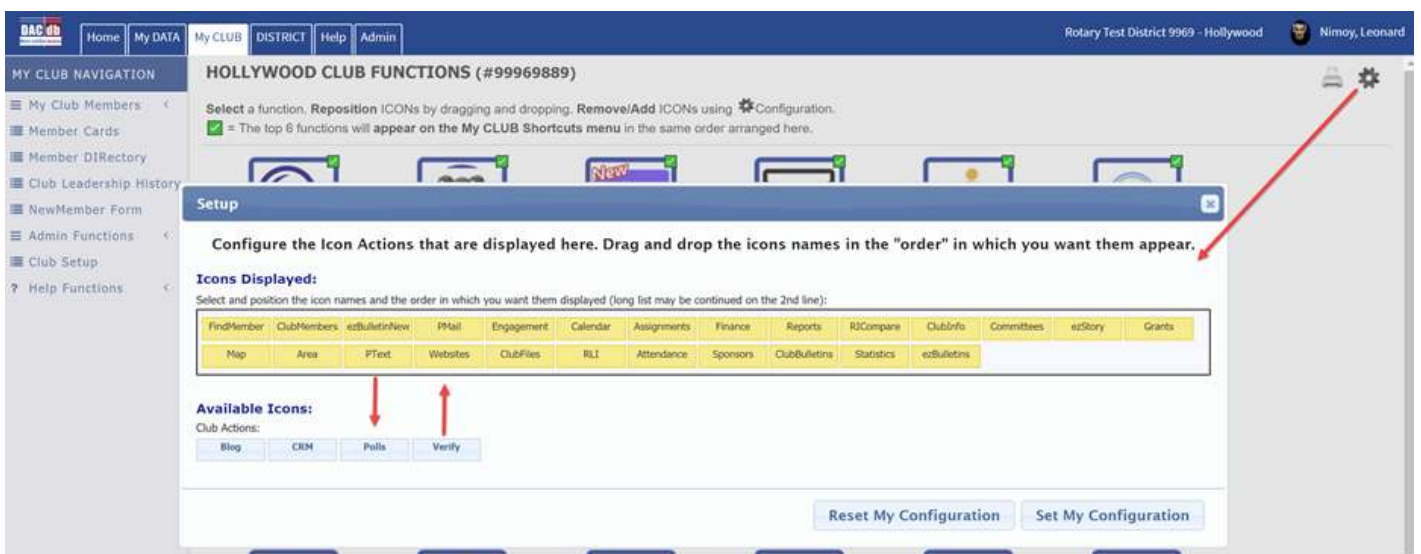

### Customizable Icon Pages

The My Club and District tab pages are equipped with a left Sidebar Menu and an Icon Field.

- The left sidebar allows you to navigate important club or district information and administrators can setup relevant customizations.
- The Icon Field provides easy to recognize images that will open the labeled function with a click or a tap.
- The top 6 icons with the check in the upper right corner will automatically be listed as shortcuts in the sidebar menu of other pages as shown on the right.

- These icons can be dragged and dropped into any order you desire based on your workflow. They may also be customized by clicking on the settings cog wheel in the upper right of the Icon Field where you can remove unneeded icons from your page or add new ones as they become necessary.
