*****All Users *****

A subscription for the plugin is required for all users. Please contact support if you do not have a subscription for the plug-in. Otherwise, a missing subscription message will be displayed.

*****iMembersDB Users *****

The plug-in short-code is no longer [imemplus_XXXXXX] The iMembersDB and DACdb plugin has been consolidated into one plugin and uses the short code [dacdbplus_XXXXX]. All references must be changed if you are on iMembersDB.

Revision History

Version	Description	Date
3.0.12	<p>Show=leaders was updated to remove borders, to added plugin parameters for:</p> <ul style="list-style-type: none"> - leaders_per_row=N Y - leader_pics = N Y - flex= N Y <p>Documents – Links to subfolders works correctly now. Club meetings, where club meets and club info combined.</p> <ul style="list-style-type: none"> - All address fields are now output(address2, address3, PostalZip) - Province fields are output when entered (vs state code) 	10/26/21
3.0.1	New shortcode dacdb_clubleaders was added. Consider using this in place of club_presidents	10/26/21
3.3.0	<p>New combined release – DACdb and iMembers using same plugin.</p> <ul style="list-style-type: none"> - Refactored code for maintainability - Added separate subscription check – outputs ECHO message when not valid - Added debugging output capability for diagnostics - Improved messaging of errors - Added Limit to Calendar option so that more than 2 events can be shown on the calendar without the +N showing 	9/20/21
	<p>Story Plugin</p> <ul style="list-style-type: none"> - Removed PageTitle option - Display option removed 	
	Calendar – new limit added to plugin settings to control the number of calendar entries per cell.	
	OrgYear – shortcode “org” parameter changed to orgyear=	
	Where Club Meets – Update the plugin values. The values were changed from numbers 1 to 5 to a more meaningful alpha character string	

Installation

The DACdb WordPress plugin is distributed as a ZIP file. The plugin can be installed manually if you have FTP access to your server or you can upload the plugin via the WP Admin.

This version of the plugin combines both the iMembersDB and DACdb systems into one universal plugin. It is important to set in the plugin configuration the system you are using.

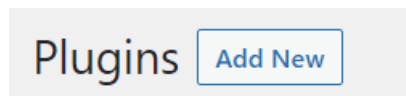

Manual via FTP

Unzip the dacdb plus plugin. FTP the contents to your server and place the “dacdbplus” folder into the wp-content/plugins folder on your server.

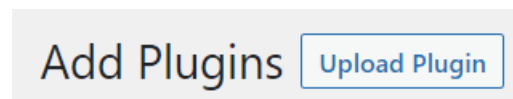

In your WP Admin, click on Plugins, locate DACdb Plus and click Activate. Then follow the instructions below to set the Plugin configuration settings.

WP Admin

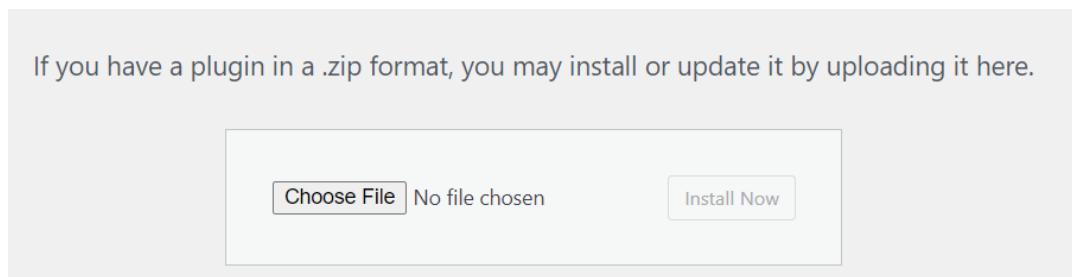

In your WP Admin click on Plugins. Near the top of the page, click the [Add New] button next to Plugins.

Again at the top of the page, find Add Plugins and click on the [Upload Plugin] button

On the next page, click on Choose File, and find the plugin ZIP file on your local computer/network. Click on [Install now].

If the plugin has never been installed, you will be offered an opportunity to activate the plugin. If the plugin was previously installed, you will be asked to replace the plugin.

SSL

The plugin has been updated to address SSL (secure socket licensing) for all the new browsers' security encryption requirements and Google's SEO ranking formulas.

Subscriptions

Use of the PlugIn requires a valid website subscription with either DACdb or iMembersDB.

The plugin will work and can be tested without a subscription, but a message similar to the following will be displayed on every plugin page like:

```
=====
Missing subscription record. System=DACdb, Account ID=7730, ClubID=0
Please contact: support@dacdb.com
=====
```

In a future version of the plugin, an API Key will be required. Support will provide you this key when needed. The API Key is entered as the 4th parameter in the Plugin settings.

Quick Tab Summary

- meeting_info
- birthdays
- members

District Shows

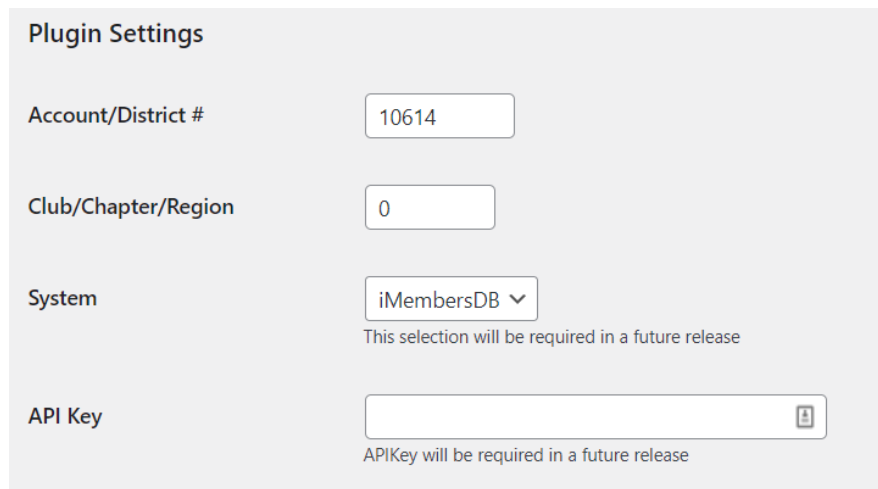

- d_events
- d_leaders
- club_presidents
- areas
- cog
- dcc

Settings

Once the plugin is activated, you need to click on the settings link to configure the settings for the dacdbplus plugin. This is typically a one-time operation and WordPress will remember the settings on future upgrade installs.

Plugin Settings

At the top of the settings page, there are four settings that need to properly connect the plugin to your district/account and club. The support team can help identify your Account/District # if needed. The plugin supports either iMembersDB or DACdb system. Select the appropriate system setting.

The screenshot shows a 'Plugin Settings' form with the following fields:

- Account/District #**: A text input field containing the value '10614'.
- Club/Chapter/Region**: A text input field containing the value '0'.
- System**: A dropdown menu with 'iMembersDB' selected. Below the dropdown is the text: 'This selection will be required in a future release'.
- API Key**: A text input field that is currently empty. Below the field is the text: 'APIKey will be required in a future release'.

Note: The API key can be entered now or skipped. In a future version of this plugin, an API key will be required for the plugin to work. Each District/Account and/or Club/Chapter/Branch has its own unique API key.

Story Settings

Story Separator	<input type="text" value="Version 2"/>
	Preview:
Story Image Position	<input type="text" value="Alternating"/>
Read More Link	<input type="text" value="Expand on page"/>
	"Expand on page" will open the read more to show the rest of the story with out loading a new page. "Open story alone" will open the story all by it's self.

Member Since Date Format	<input type="text" value="Year"/>	

Leadership Settings

Leaders Per Row	<input type="text" value="1"/>	4 per row should only be used with no sidebars.
Show Leadership Pictures	<input type="text" value="Yes"/>	
Allow Leadership to be Contacted	<input type="text" value="Yes"/>	

Newsletter Settings for Pages and Widgets

Page - # Weeks	<input type="text" value="16"/>	Default: 16
Page - Show Folders	<input type="text" value="No"/>	Will display folders below.
Page - Order Folders	<input type="text" value="Date"/>	
Widget - # Weeks	<input type="text" value="12"/>	Default: 12

Speakers Settings

# Months to Pull	<input type="text" value="6"/>	Default: 6
Cats	<input type="text" value="1,2,3,4,5,6,7"/>	Default: 1,2,3,4,5,6,7 This will filter the page and the widget.
Full Info On Page	<input type="text" value="No"/>	This will display all the speaker info on the speaker page.

Account Map

Google Maps API Key	<input type="text"/>
---------------------	----------------------

Club Presidents

Club Presidents Per Row

4 per row should only be used with no sidebars.

Committee Members Settings

Committee Members Per Row

4 per row should only be used with no sidebars.

Show Committee Members
Pictures

Allow Committee Members to
be Contacted

Show Committee Member
Position

Show Committee Member
Business Position

Show Committee Member
Classification

College of Governors

COG Per Row

4 per row should only be used with no sidebars.

Account Committee Chairs

DCC Per Row

4 per row should only be used with no sidebars.

Committee Global Settings

Show Committee Name	<input type="text" value="Yes"/>
Show Committee Description	<input type="text" value="Yes"/>
Show Member Account Number	<input type="text" value="No"/>

Events Global Settings

Show Date/Time First	<input type="text" value="No"/>
----------------------	---------------------------------

Will display the date and time then the title of the event, this will update all events/speakers to the same format.

Where Clubs Meet

Show Page Title	<input type="text" value="Yes"/>
Show Page Layout	<input type="text" value="Default"/>

Use Default if your using sort in the shortcode.

Calendar Settings

Calendar Settings	
Calendar Display View	<input type="text" value="Month"/>
Calendar Limit	<input type="text" value="5"/>

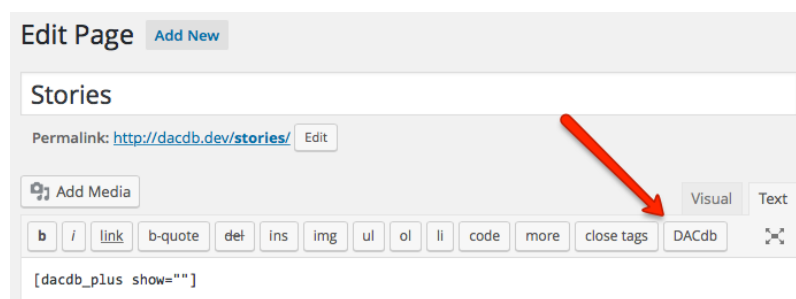

Number of events shown on any one day in Month view.

Shortcodes

The dacdbplus plugin uses “shortcodes” to dynamically retrieve data from the system and render it on the page. One or more shortcodes can be placed on a page as needed.

On a WordPress page, one would type in the shortcode reference as show below. Many shortcodes have one or more optional parameters. The entire shortcode entry is surrounded by brackets.

```
[dacdb_plus show="SHOW_NAME"]
```

Stories

By default the small images on stories alternate, you can override this and have them all on the left or right. In the database stories can be grouped with a category. Passing catid="x" will only show stories in that category.

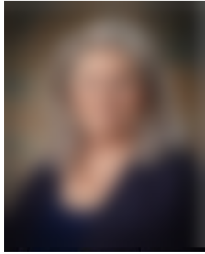

Parameter	Description
Shortcode:	[dacdb_plus show="stories"]
Usage:	Clubs and Districts
Options:	
limit=	limit the number of stories displayed
Separator	Y/N – There are 8 different styles to choose from
catid	Category ID number – Stories can be output on a page based on a Category ID (e.eg., membership, new member stories)
storyid	URL variable to display a specific story (used mostly internally)

Limitations:

Only 1 Story Shortcode is allowed on any one WordPress page.

Note: Story does not include a header on the page, so the content of the stories displays.

A Message from Governor **Ellen**!

By Ellen DeGeneres This week we celebrate World's Finest Day on Tuesday, October 27th. How is your club celebrating the day? Are you holding an awareness event? How about a walk for Paws? If you have a fun walk or a bridge to your district you can tell all about it in a group and we often make about our public relations efforts. So fun things to help ourselves. How about a poster? We have some examples, instructions and information.

Wheels in Motion - Friday September 16, 2021.pdf - 1 MB	09/08/2021

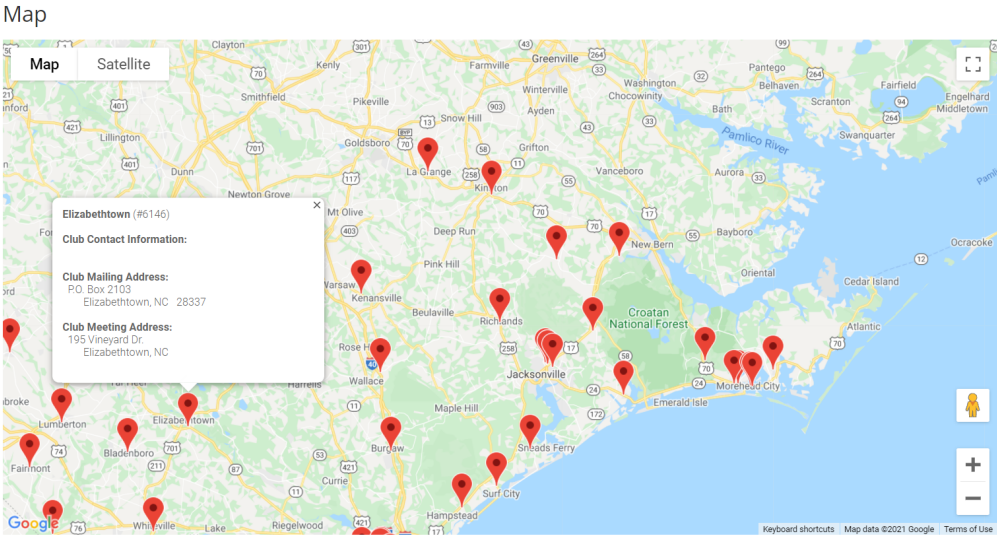

Map

Create a map of the district with meeting information for each club/chapter. The active clubs/chapters in the District/Account are displayed on the map.

Parameter	Description
-----------	-------------

Shortcode:	[dacdb_plus show="map"]
Usage:	Districts
Options:	

Note: A Google Map API key is required and must be installed in settings in the plugin.

Committees

Create a committee page that pulls from the database with committee description, member’s images, titles, contact link, business position, classification, and rows 1-4 to display information.

Parameter	Description
Shortcode:	[dacdb_plus show="committees"]
Usage:	Clubs and Districts
Options:	
CID=	Committee ID, if omitted, all committees with security-level 0 will be displayed
Description	Y N – show the committee description
OrgYear	Y N – show the committee OrgYear

District Governor

District Governor Elect

This committee is for organizational purposes only to define what responsibilities fall under the Governor Elect

District Governor Nominee

This committee is for organizational purposes only and indicates responsibilities falling under District Governor Nominee

District Leadership Council

District Rotary Foundation

District Rotary Foundation Chair for the current Rotary year, serving with Governor

Grants Training 2020_21

Documents

The default setting will pull documents from the database. For districts it pulls public district files, and for clubs it pulls public club files in DACdb. The plugin will pull top-level items and folders. The folders currently only go down the tree 2 folders.

Parameter	Description
Shortcode:	[dacdb_plus show="documents"]
Usage:	Clubs and Districts
Options:	
folder=	First folder to search
Folder2=	Second folder to search
Size=	Y N show the file size
Icon=	Y N show the folder/file ICON
Date=	Y N – show the file date
