# About Us

The Stavros Center currently occupies one of the finest facilities housing economic education in the nation. Our two-story, 3500 square foot building is comprised of offices for the staff, a conference room, a thirty-person classroom, a kitchen, a media center, and a library. Our media center and library house an up-to-date collection of texts, periodicals, journals, films, videotapes and assorted teaching aids. Our library and media resources enable teachers to utilize the most comprehensive materials available for delivering practical and meaningful economic education knowledge to their students. The FSU Stavros Center is open from 8:00 a.m. to 4:30 p.m. Monday through Friday.

## Mission, Structure, and Activities

The mission of the Stavros Center is to further free enterprise and economic education in the schools and the broader community. The Center develops and disseminates innovative ideas and materials that will help make economics more interesting and understandable. It seeks to help instructors at all levels become great teachers of economics.

Established in 1988, the Center is part of the Department of Economics, which is located within the College of Social Sciences. Faculty members associated with the Center are involved in at least one of the two major programs within the Center.

The Center is affiliated with the Council for Economic Education and the Florida Council for Economic Education. The Center's region within the Florida Council is comprised of the following 12 counties: Bay, Calhoun, Gadsden, Franklin, Gulf, Jackson, Jefferson, Leon, Liberty, Madison, Taylor and Wakulla.

The activities of the Center include:

- **Workshops and Seminars:** Provide workshops, seminars, and materials designed to promote a better understanding of economic issues for teachers, university students, and local citizens.
- **Product Development:** Develop new and creative materials and approaches for teaching economics including videos, games, and computerized materials.
- **Training for Teachers:** Offer special courses and workshops for the training of active and future social science teachers that both cover the concepts of economics and focus on how to teach them in a stimulating manner.
- **Research:** Promote research on political economy and the institutional environment for the efficient operation of a free enterprise economy.

## The Gus Stavros Story

The inspirational story of Gus A. Stavros is a tale of entrepreneurship, love, courage, success, and, above all, commitment to community, education, and making the world a better place.

We invite you to read the details.

## 2nd Harvest

By Robert M. Porter

# Thank You Libby Simmons for giving us an education about Second Harvest of the Big bend

They are based in Tallahassee and provide healthy food for our neighbors facing hunger insecurity throughout a 16 county Big Bend area.

Their mission is to advance change by feeding the hungry and educating and engaging the community in the fight to end hunger.

## Heart of Rotary

Each month in this Rotary year, our club will honor someone in the community with the Heart of Rotary award. It can be a fellow Rotarian, or someone else you feel has a servant heart and deserves to be recognized for the work they do in the community. To nominate someone for the award, please use the nomination form and send it to President Linda by the end of the month. At the first meeting of the following month, President Linda would then announce the winner of the award. If the winner is from the community, they should be invited to a meeting to enjoy a lunch with us and to receive their award. (Hopefully, they will find a kindred spirit with us and join our club.)

The award for July 2024 is presented to  
Joy Blomeley.

The award for August 2024 is presented to  
Ed Acuff.

The award for September 2024 is presented to  
Pam Terry.

The award for October 2024 is presented to  
John Crocker.

The award for November 2024 is presented to  
Brittany Seachrist  
of Humble House Ministries.

The award for December 2024 is presented to  
Jim Wadsworth.

The award for January 2025 is presented to  
William Schack  
Founder of Inclusion Cafe'.

The award for February 2025 is presented to  
David Driggers.

The award for March 2025 is presented to

# Poliovirus

Polio paralysis is caused by a human enterovirus called the wild poliovirus. It can interact in its host in two ways:

- Infection not including the central nervous system, which causes a minor illness with mild symptoms
- Infection including the central nervous system, which may cause paralysis

Less than 1% of wild poliovirus infections result in paralysis. The virus is most often spread by the faecal-oral route. It enters through the mouth and multiplies in the intestine. Infected individuals shed poliovirus into the environment for several weeks, where it can spread rapidly through a community, especially in areas of poor sanitation.

There are two forms of poliovirus:

## Wild Poliovirus

Wild polioviruses are the naturally occurring strains of poliovirus that circulate in the environment.

There are three serotypes of wild poliovirus: type 1, type 2, and type 3. Immunity to one serotype does not confer immunity to the other two. Outbreaks were largely unknown prior to the 20th century. However, with improved sanitation in the 20th century, the average age at which individuals were exposed to the virus increased. With progressively declining protection from maternal antibodies, infection increasingly resulted in paralysis.

Type 2 wild poliovirus was declared eradicated in September 2015, with the last virus detected in India in 1999. Type 3 wild poliovirus was declared eradicated in October 2019. It was last detected in November 2012. Only type 1 wild poliovirus remains.

# Variant Poliovirus (cVDPV)

## Circulating Vaccine-Derived Polioviruses

Wild poliovirus (WPV) is the most commonly known form of the poliovirus. However, there is another form of polio that can spread within communities: circulating vaccine-derived poliovirus, or cVDPV. While cVDPVs are rare, they have been increasing in recent years due to low immunization rates within communities. cVDPV type 2 (cVDPV2) are the most prevalent, with 959 cases occurring globally in 2020. Notably, since the African Region was declared to have interrupted transmission of the wild poliovirus in August 2020, cVDPV are now the only form of the poliovirus that affects the African Region.

## How cVDPVs Occur

The oral polio vaccine (OPV) that has brought the wild poliovirus to the brink of eradication has many benefits: the live attenuated (weakened) vaccine virus provides better immunity in the gut, which is where polio replicates. The vaccine virus is also excreted in the stool, and in communities with low-quality sanitation, this means that it can be spread from person to person and actually help protect the community.

However, in communities with low immunization rates, as the virus is spread from one unvaccinated child to another over a long period of time (often over the course of about 12-18 months), it can mutate and take on a form that can cause paralysis just like the wild poliovirus. This mutated poliovirus can then spread in communities, leading to cVDPVs.
