www.rotary7610.org/events/

PROGRAM: BARBARA GRUBER FROM THE NATIONAL RADIO ASTRONOMY OBSERVATORY

Astronomers around the world use radio telescopes to observe the naturally occurring radiowaves that come from stars, planets, galaxies, clouds of dust, and molecules of gas. Most of us are familiar with visible-light astronomy and what it reveals about these objects. Visible "light" – also known as optical light – is what we see with our eyes, however, **visible light** doesn't tell the whole story about an object.

Join us to learn more about radio astronomy from Barbara as she shares the whole story!
